

Addition to 10 Boom Cards

[Click Here to Download Your Boom Cards!](#)

First Time on Boom?

Boom Cards™ are self-grading, digital resources. They cannot be printed but will play on most modern browsers including Android, iPads, iPhones, desktops computers and Kindle Fires.

When you first go to download your deck of Boom Cards, you will be asked to create an account. The account is free and you will not be asked for any bank details. After you have created your free account you need to go to the navigation menu and click on 'Library', here you will find your deck of Boom Cards.

Want to Share the Deck with Your Class?

If you wish to share the deck with your students, especially for distance learning, then the easiest method for this is to use FastPlay. You will need to choose the deck of Boom Cards from your library and then click on the 'Actions' menu and select Fast Pin. Here you will be given a 4-digit code and a URL which you can share with your students via Google Classroom or email. When your students then click on this link they will be taken straight to the deck of Boom Cards and will be able to begin playing.
